# The Aga Khan University AKU Challenge (scholarship) Programme In honour of Saida and Firoz Rasul

#### Sample Test Paper - 2023

#### **Instructions:**

- Total number of questions will be 100. These will be presented on one booklet.
- Duration of the test is 2 hours.
- Questions can be attempted in any order. You must attempt all questions.
- All questions carry one mark. There will be no negative marking.
- Mark ONLY ONE answer to each question. No marks will be given for multiple answers.
- Calculator is not allowed in the test center.

The Test comprises of two sections:

- English
- **\*** Quantitative and Logical Reasoning
- 1. English has five {5} sub-sections:

•	Reading Comprehension	(10 questions)
•	Passage Completion	(10 questions)
•	Sentence Completion	(10 questions)
•	Use of Synonyms & Analogies	(10 questions)
•	Functional English	(10 questions)

2. Quantitative & Logical Reasoning (50 questions)

Please note: the questions in the sample test paper are only to make you understand the pattern of the exam. These questions will not be part of the actual test.

Sample Test Paper Page 1 of 8

# 1. ENGLISH

#### <u>SECTION – I: READING COMPREHENSION</u>

#### Read the following passage carefully and answer the questions that follow:

Line #	Passage
1	Hundreds of thousands of persons each year suffer from some type of cancer, and new methods of radiation therapy have enabled doctors to save more lives than ever before. Medical researchers have developed several experimental forms of this honored cancer treatment that seem effective in fighting the disease.
5	One promising approach involves exposing cancer cells radiation by implanting a radioactive source directly into the malignant tissue. This process greatly increases the dosage and thus the effectiveness of the treatment. Another technique utilizes drugs to make cancer cells more susceptible to the effects of radiation and to make cancer cells more resistant. Certain drugs are able to neutralize the generic framework of cancer cells, thus making them more easily affected by radiation. Both techniques have seen some positive results in the treatment of inoperable brain tumors.
15	These and other methods have helped to raise the recovery rate for cancer victims from 30 percent 40 years ago to around 50 percent today. This is encouraging news for those who fall prey to one of the world's leading killers.

#### From the passage, choose the best possible answer: A, B, C or D

#### 1. What is the author's main purpose in the passage?

- **A.** To provide statistical information on cancer
- **B.** To argue for new methods of cancer treatment
- **C.** To show new techniques of radiation therapy
- **D.** To give the results of recent cancer research

#### 2. According to the passage, which of the following is true about radiation therapy?

- **A.** There is only one effective form of this therapy
- **B.** It saves millions of lives each year
- **C.** It is an accepted method of cancer treatment
- **D.** It causes the incidence of cancer to rise dramatically
