

International Training and Research in Environmental and Occupational Health (ITREOH)

Department: Community Health Sciences

Project Sponsors: University of Alabama at Birmingham funded by NIH, USA

Duration: Mar 2002 – Sep 2014

Principal Investigator: Dr Masood Kadir,

Co-Investigator: Dr. Zafar Fatmi

Department of Community Health Sciences, Aga Khan University (AKU), Pakistan, in partnership with the University of Alabama at Birmingham (UAB) in the United States (US) is the recipient of an International Training and Research in Environmental and Occupational Health (ITREOH) grant funded by the Fogarty International Center (FIC), National Institute of Health USA. The purpose of this initiative is: (i) To establish and sustain environmental and occupational health (EOH) training (ii) To enhance research skills and expand research capacity (iii) To develop resources to support. The project was initiated in 2001 and has been funded for two cycles now extended up to 2014. Dr. Nalini Sathiakumar is the PI at University of Alabama, USA. The first cycle was UAB and Aga Khan University collaboration. The second cycle has been extended to include Manipal University in India and University of Kelaniya in Sri Lanka. Apart from training in various aspects of environment and occupational health the grant has supported pilot research projects in priority areas such as heavy metals, pesticides, indoor air pollution, occupational health, climate change
